

Verification Opinion

14 June 2022

Opinion No : SGS22/013

Mr. YAGI Shinsuke
Representative Director, President
Nissan Chemical Corporation
5-1, Nihonbashi 2-Chome, Chuo-ku, Tokyo

Objective

SGS Japan Inc. (hereinafter referred to as "SGS") was commissioned by Nissan Chemical Corporation (hereinafter referred to as "the Organization") to conduct independent verification based on Criteria of Verification (ISO14064-3: 2019 and the SGS verification protocol) regarding the data prepared by the Organization on the scope of verification (hereinafter referred to as "the statement"). The objective of this verification is to confirm that the statement in the Organization's applicable scope has been correctly calculated and reported in the statement in conformance with the criteria, and to express our views as a third party. The organization is responsible for the preparation and fair presentation of the statement.

Scope

The scope of verification is Scope1 and 2 emissions, energy consumption, and Scope3 emissions.

The period subject to report is from 01 April 2021 to 31 March 2022.

Refer to the attached sheet for the detailed scope of verification.

Procedure of Verification

The statement was verified in accordance with Criteria of Verification, and the following processes were implemented at a limited level of assurance:

- Verification of the calculation system: Interviews on the measurement, tabulation, calculation and reporting methods employed by the Organization as well as review of related documents and records
- Verification of the statement: On-site verification and review of vouchers conducted at Nagoya Plant and Biological Research Laboratories, and analytical procedures and interviews for other sites in the scope of verification carried out at the head office

The criteria for this review are based on, Act on the Rational Use of Energy, GHG Emissions Calculation and Reporting Manual Ver. 4.8, the Basic Guidelines on Accounting for Greenhouse Gas Emissions throughout the Supply Chain Ver. 2.4, the Database of emissions unit values on the same Accounting Ver. 3.2, and the protocol specified by the Organization.

Conclusion

Within the scope of the verification activities employing the methodologies mentioned above, nothing has come to our attention that caused us to believe that the Organization's statement was not calculated and reported in conformance with the criteria.

SGS Japan Inc. affirms our independence from the organization, being free from bias and conflicts of interest with the Organization.
